Directory of Open Access Journals (DOAJ)

DOAJ is an online directory that indexes and provides access to high quality, open access, peer-reviewed journals.

All journals that were accepted into DOAJ before March 2014 are now required to reapply. If you have a journal indexed in DOAJ, please log into your [Publisher Area](#) and follow the instructions.

[Copyright and Licensing Incompatibility – Part 1](#)

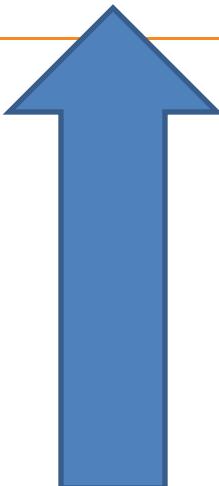

Copyright and Licensing. Not always compatible and yet we see these two thrown together in incompatible ways all the time. This is the first of two posts on this subject. In this post, I'll illustrate DOAJ's experience in this murky area, showing you the sorts of conundrums we come up against every day in the [...] [Read More...](#)

Pilih Country

A screenshot of a search interface, likely from a digital library or academic database. At the top left are buttons for 'share', a search bar with 'x 10', and a dropdown menu labeled 'order by ... relevance'. To the right is a search bar with 'search all' and a dropdown menu for 'search term' containing various fields: 'Title', 'Keywords', 'Subject', 'ISSN', 'DOI', 'Country of publisher' (which is highlighted with a red box), 'Journal Language', 'Publisher', 'Article: Abstract', 'Article: Year', 'Article: Journal Title', and 'Journal: Alternative Title'. A large blue arrow points from the left towards the 'Country of publisher' option. Another orange arrow points from the right towards the same option. Below the search bar, there are two search results. The first result is for 'Scientia Medica. 2005;15(1):74-78' with links for 'Abstract | Full Text'. The second result is for 'Importance of vitamin B12 screening in'.

AUSTRALIAN SOCIETY
for COMMERCE INDUSTRY & ENGINEERING

A royal mess.

A completely bogus scholarly society, the [Australian Society for Commerce Industry & Engineering](#), uses numerous tricks to make itself look legitimate. This publisher lifts pictures of professors from the internet, gives them new names, and advertises them as editors-in-chief of its mediocre journals.

Instructional quality of Massive Open Online Courses (MOOCs)

Anoush Margaryan*, Manuela Bianco, Allison Littlejohn

Caledonian Academy, Glasgow Caledonian University, Glasgow G4 0BA, UK

ARTICLE INFO

Article history:
Received 7 February 2014
Received in revised form
8 August 2014
Accepted 12 August 2014
Available online 26 August 2014

Keywords:
Massive Online Open Courses
Distributed learning environments
Evaluation methodologies
Lifelong learning
Pedagogical issues

ABSTRACT

We present an analysis of instructional design quality of 76 randomly selected Massive Open Online Courses (MOOCs). The quality of MOOCs was determined from first principles of instruction, using a course survey instrument. Two types of MOOCs (xMOOCs and cMOOCs) were analysed and their instructional design quality was assessed and compared. We found that the majority of MOOCs scored poorly on most instructional design principles. However, most MOOCs scored highly on organisation and presentation of course material. The results indicate that although most MOOCs are well-packaged, their instructional design quality is low. We outline implications for practice and ideas for future research.

Editorial procedure

Double-blind peer review

This journal follows a double-blind reviewing procedure. Authors are therefore requested to submit two documents at the time of their submission:

- ▶ A title page only, which includes:
 - A concise and informative title
 - The name(s) of the author(s)
 - The affiliation(s) and address(es) of the author(s)
 - The e-mail address and fax number of the corresponding author
- ▶ A blinded manuscript without any author names and affiliations. Authors should avoid language that could identify themselves as the authors. Authors should properly cite and reference their own work, but should not use phrases such as "In our previous work (Smith, 2011), we presented..." which identifies the author. Such work should be referred to in the third person, e.g., "Previously Smith (Smith, 2011) presented...".

The blinded manuscript should contain:

- A concise and informative title
- Abstract: Please provide an abstract of 150 to 250 words. The abstract should not contain any undefined abbreviations or unspecified references.
- Keywords: Please provide 4 to 6 keywords which can be used for indexing purposes.

Real-time mutual gaze perception enhances collaborative learning and collaboration quality

Bertrand Schneider · Roy Pea

Received: 7 May 2013 / Accepted: 17 September 2013 / Published online: 4 October 2013
© International Society of the Learning Sciences, Inc. and Springer Science+Business Media New York 2013

Abstract In this paper we present the results of an eye-tracking study on collaborative problem-solving dyads. Dyads remotely collaborated to learn from contrasting cases involving basic concepts about how the human brain processes visual information. In one condition, dyads saw the eye gazes of their partner on the screen; in a control group, they did not have access to this information. Results indicated that this real-time mutual gaze perception intervention helped students achieve a higher quality of collaboration and a higher learning gain. Implications for supporting group collaboration are discussed.

Keywords Collaborative learning · Awareness tool · Eye-tracking

Introduction

Foundational work in developmental psychology and in the learning sciences demonstrates that joint attention plays a crucial role in any kind of social interaction: From babies learning from their caregivers to parents educating their children, to young learners from school teachers

Author Guidelines

1. GENERAL

Aims and Scope

The *Journal of Computer Assisted Learning* is a bi-monthly, peer-reviewed, international journal which covers empirical research on the uses of information and communication technologies to support learning and knowledge exchange. It aims to facilitate both communication within this research community and mutual understanding between researchers and practitioners. A non-exhaustive list of research areas of interest are: collaborative learning; knowledge engineering; open, distance, mobile and networked learning; immersive learning; and evaluation studies of the use of ICTs in learning. The research published in the journal is intended to maximise influence on both theory and practice within education, vocational training and professional development. Each volume includes one, sometimes, two "Special Issues" which provide readers with an in-depth perspective on a specific topic.

Though the technologies used for teaching and learning have radically changed since its first issue in 1985, JCAL continues to strive to make the outcomes of contemporary research and experience broadly accessible. JCAL welcomes:

- Empirical reports, single studies or programmatic series of studies on computers in learning
- Critical and original meta-reviews of literature on computers in learning
- Theoretical expositions on the role of computers in learning
- Materials and book reviews

The journal web pages give a taste of the subjects included and the types of papers published.

Although JCAL publishes papers that relate to grounded empirical research, papers which report on innovative technology-based systems are also acceptable provided that the use of the technology is justified on educational grounds and is more than a mere design. Proof of learning is a must. Clear statements for the pedagogical rationale for the systems development must be made at the beginning of the paper.

Authors should note the following when submitting a paper:

- Relevance: Does your paper fall within the aims and scope of the journal?

Journal of Computer Assisted Learning

A delineation of the cognitive processes
manifested in a social annotation environment

S.C. Li, J.W.C. Pow & W.C. Cheung

Department of Education Studies, Faculty of Social Science, Hong Kong Baptist University, Kowloon Tong, Kowloon, Hong Kong

Abstract

This study aims to examine how students' learning trajectories progress in an online social annotation environment, and how their cognitive processes and levels of interaction correlate with their learning outcomes. Three different types of activities (cognitive, metacognitive and social) were identified in the online environment. The time series of different levels of cognitive and metacognitive activities correlate with one another, indicating that a kind of symbiotic or ecological relationship exists among the cognitive and metacognitive processes. The multiple regression results show that low-cognitive level activities mediate the effect of high-cognitive level activities on student's performance in the group inquiry learning project. The results of multilevel analysis indicate that the average number of highlighted texts posted per person in a group accounted for over 50% of the variance of the group inquiry learning project scores. Further, the results also indicate that the level of collaboration within a group explains over 70% of the variance of the high-level cognitive and metacognitive activities across different groups. In sum, group collaboration is found to be conducive to fostering high-level cognitive and metacognitive activities.

SCHOLARONE MANUSCRIPTS*

This journal uses ScholarOne Manuscripts (previously Manuscript Central) to peer review manuscript submissions. Please read the guide for ScholarOne authors before making a submission. Complete guidelines for preparing and submitting your manuscript to this journal are provided below.

Unless agreed otherwise all accepted papers become the copyright of Association for Information Technology in Teacher Education. All contributors should be aware they are addressing an international audience.

This journal is compliant with the Research Councils UK OA policy. Please see the licence options and embargo periods [here](#).

Electronic Submission. Manuscripts, preferably between 6000 and 7000 words, and not more than 7000 words, should be made online at the Technology, Pedagogy and Education ScholarOne Manuscripts site . New users should first create an account. Once a user is logged onto the site submissions should be made via the Author Centre.

Books for review should be sent to Dr Chris Higgins, Westminster Institute of Education, Oxford Brookes University, Harcourt Hill, Oxford OX2 9AT, United Kingdom chiggins@brookes.ac.uk.

Manuscripts submitted should be original, not under review by any other publication and not published elsewhere.

All pages should be numbered. Footnotes to the text should be avoided. Sponsorship of research reported (e.g. by research councils, government departments and agencies, etc.) should be declared. To allow refereeing, all submissions must be properly formatted for anonymous reviewing. Authors' names and institutions should be typed on a separate sheet and submitted with the manuscript. The full postal and email address of the author who will check proofs and receive correspondence and offprints should also be included.

Each paper should be accompanied by an abstract of 100 to 150 words.

Tables and captions to illustrations. Tables must be submitted as separate files and not included as part of the text. The captions to illustrations should be gathered together and also uploaded as a separate file. Tables and Figures should be numbered consecutively by Arabic numerals. The approximate position of tables

REVIEW ARTICLE

***The South Asia Archive*, Taylor & Francis, 2013, www.southasiarchive.com**

David Arnold*

University of Warwick, UK

The publication of the South Asia Archive creates a vast new digital resource for students and scholars of the South Asia region. Ranging very widely across the arts, humanities and social sciences, and also notably incorporating science, technology and medicine, the Archive incorporates extensive visual material and ephemera as well as sample text material from a huge array of published sources, from books, magazines and journals to dictionaries, institutional reports and committee proceedings. Although the Archive does not provide a complete set of many serials and multi-volume items, it does demonstrate the richness and diversity of readily searchable South Asia materials (especially for the period 1800–1950) and should serve to encourage and inform fresh research in several important areas.

Keywords: digital; archive; documents; serials

Whether the study of South Asia has been inhibited by the want of an extensive digital archive is hard to tell without an extensive trawl through the sources available to scholars of other regions. But, impressionistically at least, one is often led to envy, if not to marvel, at the ease with which historians of, say, sixteenth- and seventeenth-centuries England can turn to a wealth of digitized pamphlets, tracts, visual material and state papers and can use this material for their teaching and research. South Asia has, by contrast, lacked such

Language and Speech provides an international forum for communication among researchers in the disciplines that contribute to our understanding of the production, perception, processing, learning, use, and disorders of speech and language. The journal accepts reports of original research in all these areas. Interdisciplinary submissions are encouraged. Corpus-based, experimental, and observational research bringing spoken or written language within the domain of linguistic, psychological, or computational models are particularly welcome.

This journal is a member of the Committee on Publication Ethics (COPE).

Abstract

Diachronic velar palatalization is taken as the case study for modeling the emergence of a new phoneme category. The spread of a palatalized variant through the lexicon is treated as a stochastic classification task for the listener/learner. The model combines two measures of similarity to determine classification within an exemplar-theoretic framework: acoustic distance and phonotactic expectation. There are three model outcomes: contrast, allophony, or contextual neutralization between the plain and palatalized velars. It is shown, through a series of simulations, that these can be predicted from the distribution of sounds within the pre-change lexicons, namely, the ratio of the /k-vowel/ sequences containing naturally palatalizing vowels (i, ɪ, e), to those containing non-palatalizers. “Unnatural” phonotactic associations can arise in individual lexicons, but are sharply limited due to the large size of the lexicon and the local nature of the phoneme changes. “Anti-natural” distributions, which categorically violate the proposed implicational relationship between palatalization and frontness/height, are absent. This work provides an explicit and restrictive model of phoneme change. The results also serve as an

Aims and Scope

The International Journal of Educational Management provides a forum for the exchange of ideas and debate on effective management practice. It covers best practice in the management of educational institutions, the development of educational management theory, and the application of management theory to educational practice.

As the whole structure and function of education changes, it is important to keep abreast of new developments in educational management.

The International Journal of Educational Management addresses common perspectives on common issues.

Sample articles

The International Journal of Educational Management (IJEM) provides those interested in the management of educational institutions with a broad overview of developments and research. It shows how new ideas can be applied worldwide. The journal contains material relating to innovation and change, the development of educational delivery mechanisms, and the creation of an environment in which the most efficient outputs achievable on an international basis to allow the sharing of new initiatives.

As the whole structure and function of education changes, it is important to keep abreast of new developments in educational management.

The International Journal of Educational Management addresses the increasingly complex role of the educational manager, offering international perspectives on common issues.

“Leadership” and the social: time, space and the epistemic

Scott Eacott

Australian Catholic University, North Sydney, Australia

“Leadership” and
the social

Received 13 September 2011

Revised 2 November 2011

24 November 2011

Accepted 26 November 2011

Abstract

Purpose – “Leadership” is arguably the central concept of interest in contemporary scholarship on educational administration. Within this scholarly discourse, there is an explicit assumption that leadership is a “real” phenomenon that is not only important, but also necessary for educational institutions. However, few scholars engage with issues surrounding the confusion of a socially constructed label with an assumed empirical reality. The aim of this paper is to mobilise critical social theory and to discuss the concept of leadership in educational administration.

Design/methodology/approach – To engage with this matter, the author mobilises critical social theory, specifically that of Pierre Bourdieu, to discuss the concept of leadership in educational administration.

Findings – In doing so, the author argues that: “leadership” is a label taken from common language into scholarly discourse for the purpose of solving a perceived problem in the empirical world, and that this is made possible through a particular constitution of the social space.

Research limitations/implications – The central argument of this paper challenges the hegemonic position of educational leadership scholarship, particularly its mobilisation of context, both time and space.

Originality/value – Unlike scholarship focused on developing an explanation of what constitutes leadership, this paper engages with the abstraction of “leadership” as an educational administration concept.

Keywords Leadership, Bourdieu, Educational administration, Epistemic, Temporality, Education

Paper type Conceptual paper

Introduction

Leadership is arguably the most commonly used concept or label in contemporary research in, and the practice of, educational administration. However, in the broader organizational research discourses, while central, the scholarly value of leadership as a

NOTES TO CONTRIBUTORS

Language Editing pre-submission

OUP offers pre-submission language editing through **Oxford Language Editing**, a service for researchers all over the world. Language editing, particularly if English is not your first language, can be used to ensure that the academic content of your paper is fully understood by the journal editors and reviewers. Visit www.oxfordlanguageediting.com to find out more about the freelance editors available and the different services offered. Please note that edited manuscripts will still need to undergo peer-review by the journal.

General guidelines

Articles submitted to *Applied Linguistics* should represent outstanding scholarship and make original contributions to the field. The Editors will assume that an article submitted for their consideration has not previously been published and is not being considered for publication elsewhere, either in the submitted form or in a modified version.

Articles must be written in English and not include libelous or defamatory material. Manuscripts accepted for publication should not exceed 8,500 words including all material for publication in the print version of the article, except for the abstract, which should be no longer than 175 words. Additional material can be made available in the online version of the article. Such additions will be indexed in the print copy.

Applied Linguistics operates a double-blind peer review process. To facilitate this process, authors are requested to ensure that all submissions, whether first or revised versions, are anonymized. Authors' names and institutional affiliations should appear only on a detachable cover sheet. Author's name(s) should be substituted by 'author' throughout the paper, e.g. in references to the author's own work. Submitted manuscripts will not normally be returned.

Manuscripts should be written in English and must be submitted online through our Online Submission Website. For full Instructions click [here](#). Once you have prepared your manuscript according to the instructions please visit the [online submission website](#).

Articles should be original and should not include libellous or defamatory material.

Each contributor should provide a brief biodata of about 90 words listing main interests, recent publications, and a contact address. Email address is optional.

If your article contains extracts from other works, especially Figures, Tables, poetry etc., please contact the authors and publishers before submitting the final version to seek permission to use their work. If primary data is to be included, research participants should have signed a consent form.

All contributors whose articles are accepted for publication will be required to sign a copyright assignment form, and to confirm that their article is original, accurate (inasmuch as can be ascertained in research), and does not include any libellous statements.

Dogmas and Distortions: Legal Positivism Defended *A Reply to David Dyzenhaus*

MATTHEW H. KRAMER*

Abstract—In a recent full-length review of Matthew Kramer's *In Defense of Legal Positivism*, David Dyzenhaus has attacked legal positivists' accounts of adjudication and their views of the relationship between law and morality. The present essay defends legal positivism against his strictures, by arguing that he has misunderstood specific texts and the general lines of enquiry which the positivists pursue.

ABOUT JOURNAL

[Description](#)
[Editorial Board](#)
[Contact Editorial Office](#)

DESCRIPTION

The Elementary School Journal has served researchers, teachers, and practitioners in the elementary and middle school education for over one hundred years. ESJ publishes peer-reviewed articles dealing with both research and their implications for teaching practice. In addition, ESJ presents articles that relate the latest research in child development, cognitive psychology, and sociology to school learning and teaching.

ESJ prefers to publish original studies that contain data about school and classroom processes in elementary or middle schools while occasionally publishing integrative research reviews and in-depth conceptual analyses of schooling.

The University of Chicago Press Guidelines for Journal Authors' Rights

As a leader in scholarly publishing, the University of Chicago Press has embraced its obligation to disseminate scholarship of the highest standard, to advance scholarly conversation within and across traditional disciplines, and to help define new areas of knowledge and intellectual endeavor. When you publish an article in a journal of the University of Chicago Press or one of its publishing partners, you reap the benefit of a professional publishing house with over a century of commitment to the scholarly enterprise. With our publishing expertise in both traditional and emerging channels of communication, we ensure the widespread distribution of your article throughout the world and to the broadest audience.

The University of Chicago Press supports and encourages our authors' own efforts to promote and disseminate their works. These Guidelines answer the questions we hear most often from our authors about their rights to reuse their articles. Your rights are governed by your Publication Agreement and by the provisions of these Guidelines, as in effect at the time of your proposed use of your article. If you have a question that is not addressed here, please contact:
